

# EP ENERGY EU24100(C) Li-ion Battery

- Fits in most electric pedestrian pallet trucks and stackers
- Standard integrated charger for greater charging convenience
- BMS system to maximize the battery lifetime

## **FEATURE**

## Fits in most electric pedestrian pallet trucks and stackers

EU24100(C), EP's 24V100AH lithium battery, features an ultra-slim battery design of 130 mm thickness for a wide variety of electric pedestrian pallet trucks and stacker applications.

EP EU24100C lithium battery is equipped with a 24V/30A integrated charger as standard for greater charging convenience on daily usage. A 24V/30A external charger is also available as an option.

Operators can take the opportunity of charging during shift breaks. This maximizes uptime. Trucks are always available when needed.

Long battery life with less maintenance costs

EP EU24100(C) lithium battery comes with a naturally long life cycle thanks to Li-ion technology. It is maintenance-free and assures workplace safety with no water filling, air ventilation, and acid spills required.

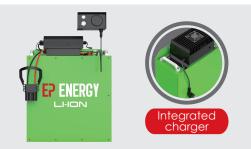

## BMS system to maximize the battery life time

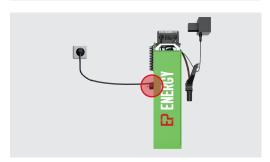

EP's BMS system constantly monitors the status of the battery such as the temperature of the battery cells and it calculates the batteries' state of charge. It keeps the battery in a safe and stable condition.

 Real-time battery monitoring display and power switch

EP EU24100(C) lithium battery offers a battery indicator which can be equipped in the cabin. Operators can monitor the battery condition in real time and control power supply during an operation.

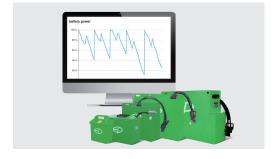

## Battery life span (complete charge and discharge cycles)

Li-ion Battery	Lead-acid Battery	
>2000 times	1000 times	

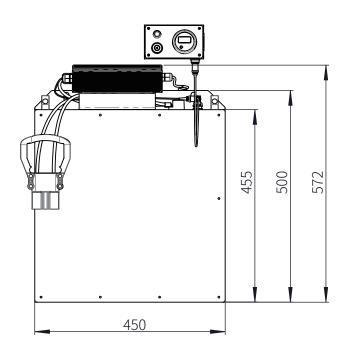

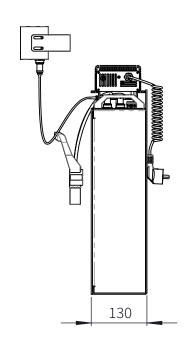

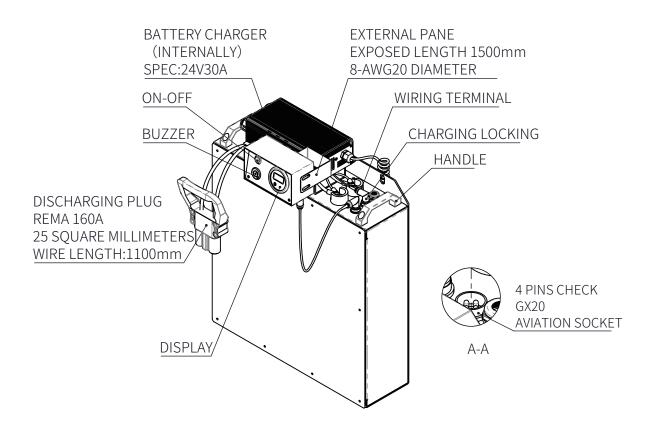

## PARAMETERS

	EU24100	EU24100C
Battery Type	LFP	LFP
Battery Color	Green	Green
Nominal Capacity (Ah)	100	100
Nominal Voltage (V)	24	24
Standard Charge Current(A)	30	30
Protection Class	IP54	IP54
Battery Weight(kg)	42	45
Box Dimensions (mm)	450*130*560	450*130*572
Operating Temperature-Discharge( $^{\circ}$ C)	-20℃-55℃	-20℃-55℃
Operating Temperature-Charge( $^{\circ}$ C)	0℃-40℃	0℃-40℃
Charger	24V/30A External	24V/30A Integrated

## **DIMENSIONS**

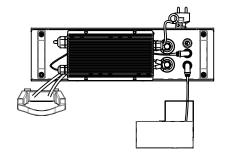

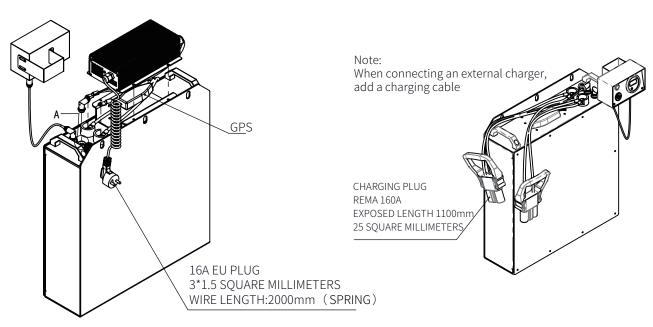

#### NOTES:

- 1.WEIGHT:45Kg
- 2.FINISH:GREEN POWDER COAT
- 3.SPECIFICATIONS:24V100Ah

## WARRANTY

Save your maintenance effort with EP's superior warranty. Your money will be well spent. For batteries with capacity ≤ 100AH: EP Energy provides 24 months or 2,000 hours, whichever comes first, for the battery cell and 24 months for parts.

### FAQS »

#### ■ What is the life expectancy of the battery?

Generally, the Lithium ion batteries can live as long as the truck. EP warrants that the Li-ion battery technology will provide you with 2,000 complete charge and discharge cycles and still ensure over 80% of usable capacity. Replacement with Li-ion is not necessary anymore.

### ■ What happens if we keep charging the batteries? Does it affect battery life?

EP Li-ion battery comes with battery management systems (BMS). When the battery is fully charged, it will automatically power off. This will not affect the lifetime of Li-ion battery. The battery prefers quick charges. So charging during break times is the new normal way of working with batteries.

### ■ How do Li-ion batteries perform in environment of extreme temperatures?

The batteries can run in relatively extreme temperatures, from minus 20 degrees to up to 55 degrees. The more comfortable the battery feels, the longer its lifetime.

### ■ Does it affect truck performance when exchanging Lead-acid to Li-ion battery?

No, a truck performance should not be affected by energy supply. EP EU24100(C) lithium battery is specially designed as Li-ion replacement to the electric pedestrian pallet trucks and stackers from most brands. Just add the counterweight and swap your truck battery, without additional adjustment. There is no change of conditions on driving performance

#### ■ What is BMS system and how does it work?

The BMS plays a crucial role to protect the battery against over and under voltage and over and under temperature. The BMS also balances the cells. This system secures the battery longevity and improves battery performance. Also charging is optimized and charging and discharging cycles are stored in its memory. The data can be read on the display, PC or online with the optional Telematics system.
